# SRK 921 FEATURES

## LED LIGHTING WITH IDENTITY

With a design that magnetizes in the dark, the SRK 921 is imposing before it even starts. The front lighting body is reminiscent of the eyes of a predator. The DRLs, with a signature of two sharp arcs, frame the dual headlights and give a dynamic look. The “U”-shaped rear light, with a strong three-dimensional effect and uniform red diffusion, gives one of the most recognizable and impressive tails on motorcycle. Every detail, from the design of the headlights to the intensity of the lighting, embraces technology and aesthetics.

## FOUR CYLINDER HEART

The 921cc 16V DOHC inline four-cylinder engine delivers a peak power output of 127.5 Bhp at 10,000 rpm and 93 Nm of torque at 8,000 rpm, offering dynamic performance and immediate response. Ride-by-Wire translates every command into instantaneous acceleration, while the Quick-shifter (up/down) offers faster, smoother changes without the use of a clutch. Cruise Control improves the travel experience and the slipper clutch keeps downshifts under control, in sport or everyday use.

## FULL COLOUR TFT DISPLAY + 1080P DASHCAM

The SRK921 is fitted with a 1080P forward facing dashcam and has a full colour TFT with clear display: Bluetooth/Wi-Fi connectivity, Cruise Control, TCS, TPMS front/rear (pressure & temperature). Trip computer with speedometer, tachometer, TOTAL/Trip A/Trip B, fuel level, coolant temperature and time.

## HIDDEN DETAILS - CLEAR IDENTITY

The double taillight under the tail is a natural continuation of the rear light. Hidden, flush-mounted, foldable passenger footrests are integrated into the lower part of the taillights and "disappear" when not in use. A combination of aesthetics and functionality that signs the SRK 921.
